

Samin Amanat  
Prof. Colber  
COMSC-110\_1021  
20 June 2018  
Week 1 Day 3

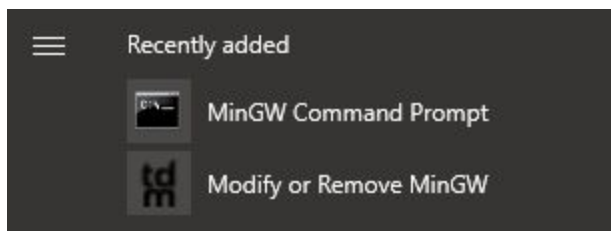

1. I intend to use my personal computer, which I built myself, meaning it doesn't have a specific make/manufacture. It has the newest version of Windows 10 Home.

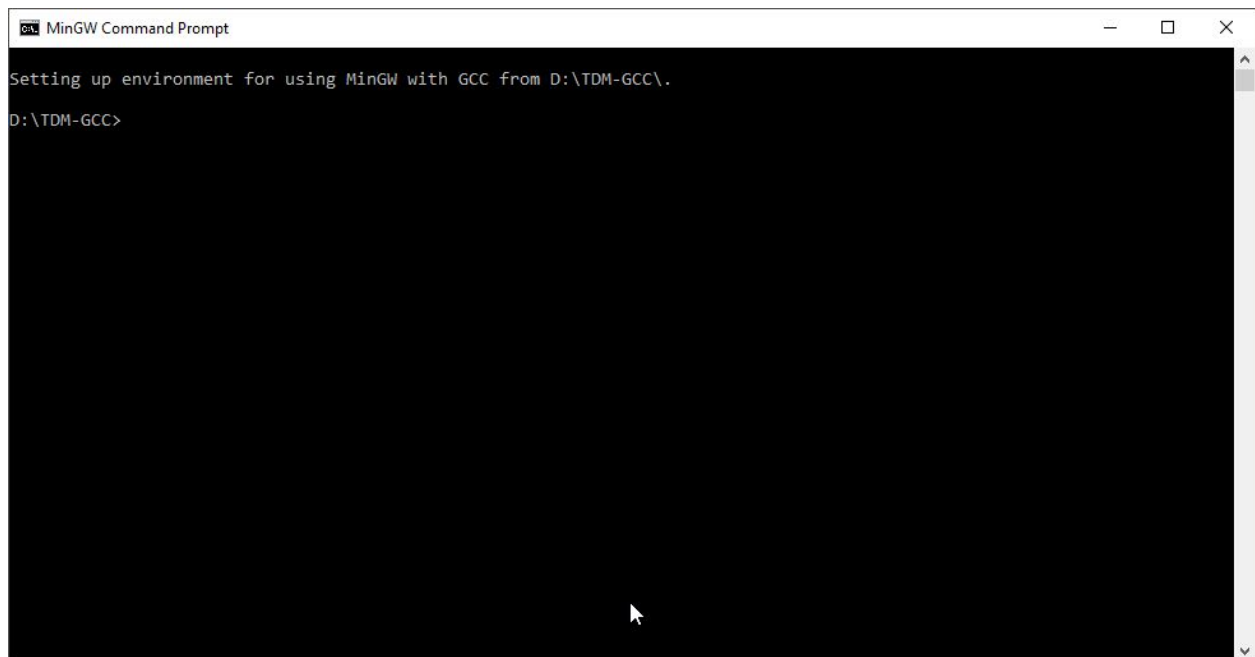

2. My editor is default Notepad however I also have access to sublime text, atom, visual studio, and notepad++ if necessary, however we'll be using Notepad for this course.

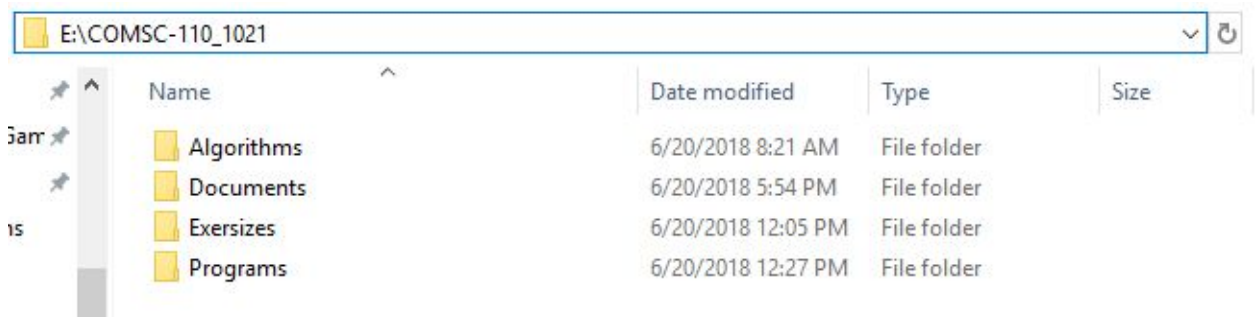

3. The compiler that I will be using is TDM MinGW Command Prompt.

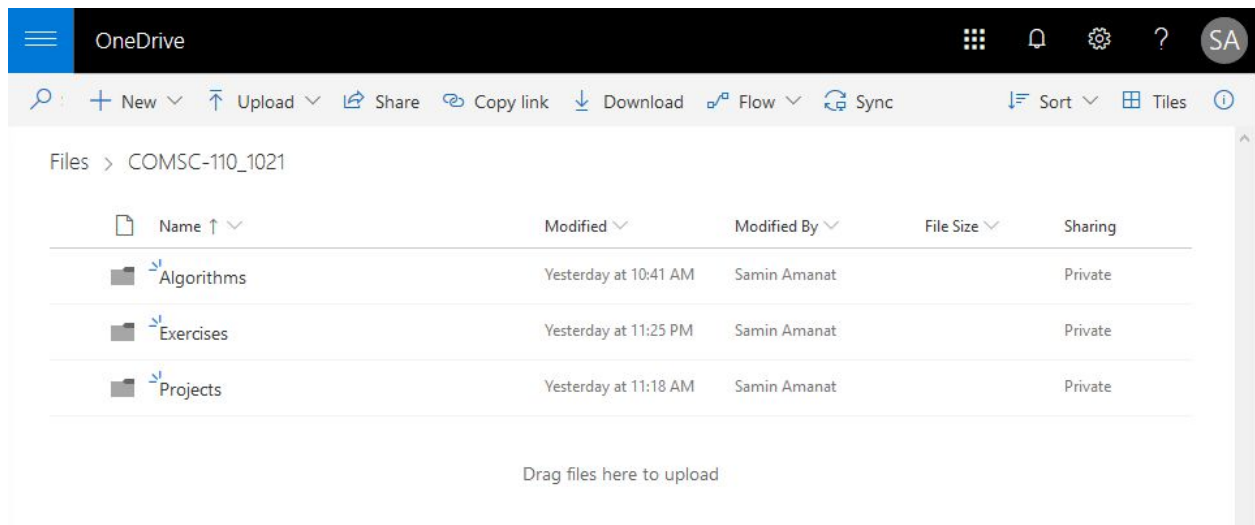

A screenshot of a MinGW Command Prompt window. The title bar reads "MinGW Command Prompt". The command prompt shows the text "Setting up environment for using MinGW with GCC from D:\TDM-GCC\." followed by the prompt "D:\TDM-GCC>". The background is black, and the text is white. A mouse cursor is visible near the bottom center of the window.

```
MinGW Command Prompt
Setting up environment for using MinGW with GCC from D:\TDM-GCC\
D:\TDM-GCC>
```

4. I have a working folder on my PC, my Flash Drive, and my OneDrive Cloud Storage. I will mostly use my Flash Drive and use the other two as backups.

A screenshot of a Windows File Explorer window. The address bar shows the path "E:\COMSC-110\_1021". The left sidebar shows a tree view with "COMSC-110\_1021" selected. The main pane displays a table of folders and files.

Name	Date modified	Type	Size
Algorithms	6/20/2018 8:21 AM	File folder	
Documents	6/20/2018 5:54 PM	File folder	
Exersizes	6/20/2018 12:05 PM	File folder	
Programs	6/20/2018 12:27 PM	File folder	

5. I configured the Windows 10 file explorer to show detailed view and not hide file extensions by clicking view at the top, and selecting those options.
